Maximo Mobile Material Request app for Desktop Requisition workflow

Saurabh Gupta
*Principal Solutions Architect,
Technology Expert Labs
IBM*

AGENDA

- **MATERIAL REQUEST MOBILE APP FEATURES**
- **MOBILE APP CUSTOMIZATION**
- **DEMO**

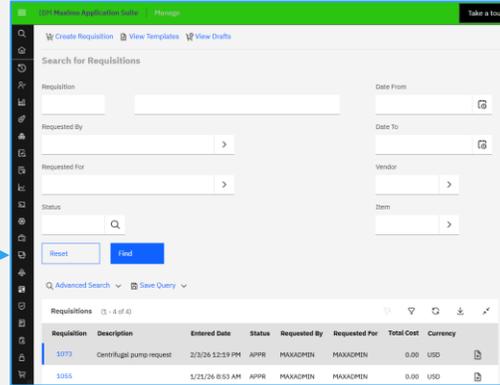

DR USER FLOW

Uses Maximo Desktop Creates DRs

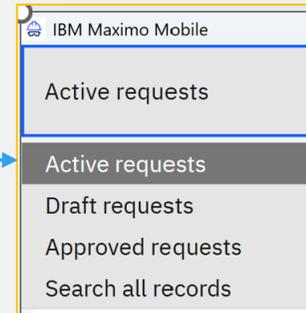

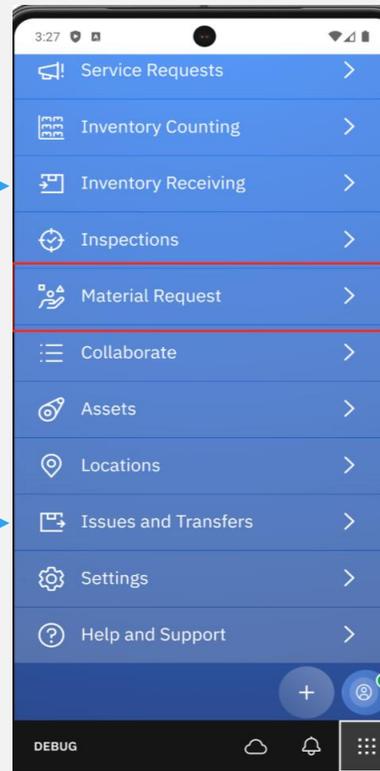

Change DR status to waiting for approval

Eli (Self service security group user)

Uses Maximo Mobile to Send DRs for approval

Kathy (Technician security group user)

- **Active requests** - waiting for approval DRs
- **Draft requests** - Draft and Rejected DRs
- **Approved requests** – Approved DRs
- **Search all records** – Search DRs for the user site

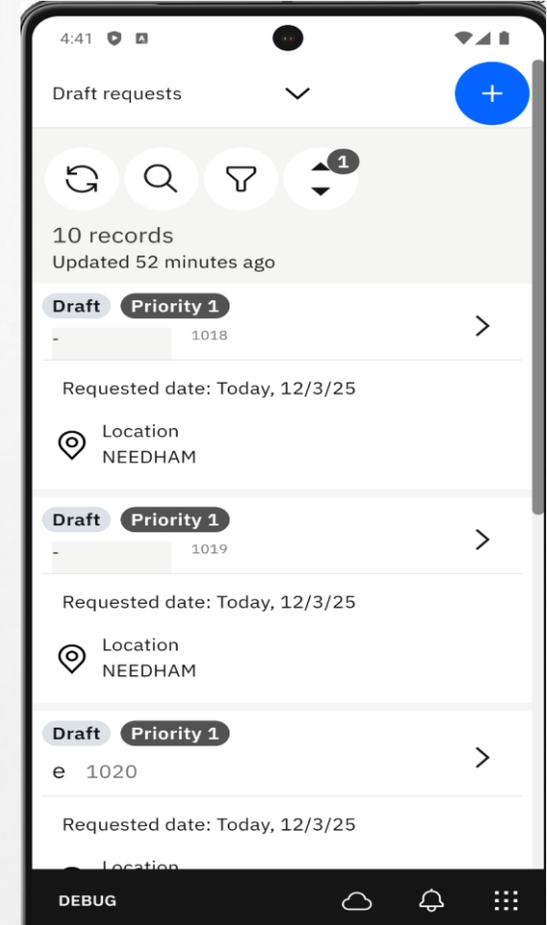

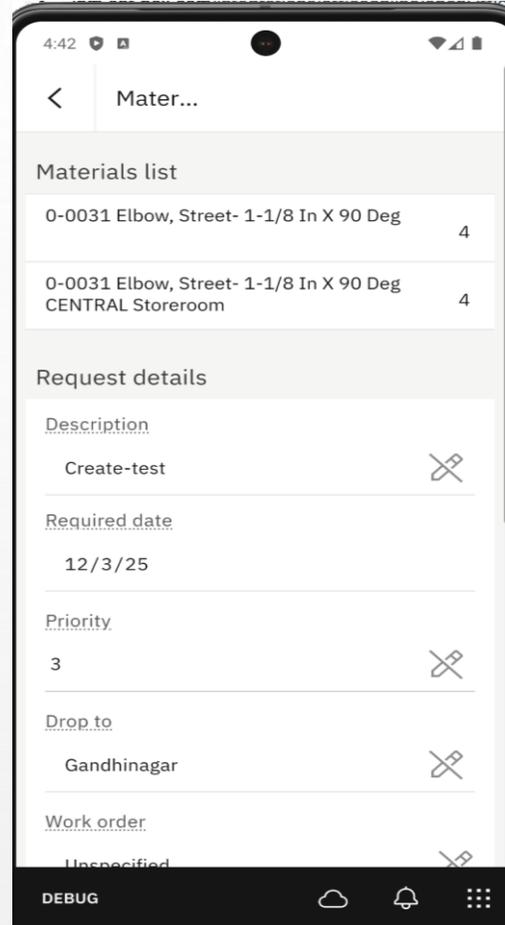

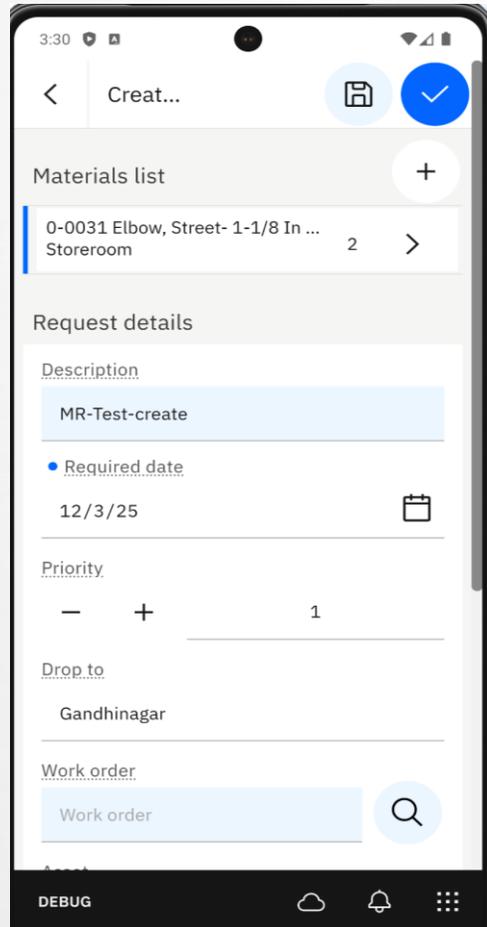

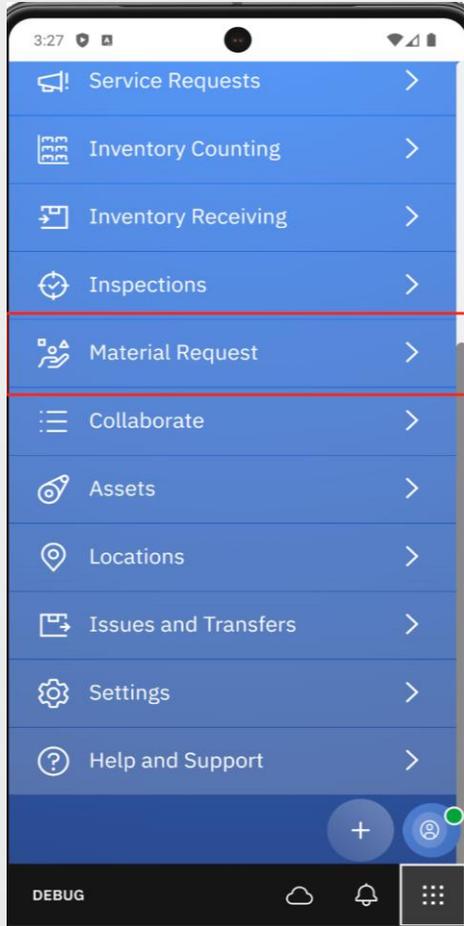

Uses Maximo Mobile to Approve/Reject DRs

Wilson (Supervisor security group user)

Goal: Separate the existing Material request from Technicians app and have it as a separated app, fully integrated to the Mobile technician experience, allowing technicians to: Create requests, View existing requests

Mobile Screenshot:

OBJECTIVE FOR MAF APPLICATION CONFIGURATION IN 9.1

OBJECTIVE FOR MAF APPLICATION CONFIGURATION IN 9.1

Migrate the application from being docker-dependent and using local storage, to a standard MAS application with a dedicated pod, granted via security groups and accessible through the MAS UI.

MAXIMO MOBILE DEMO
